

WHAT IS SENATE BILL 1383?

COMMERCIAL

In September 2016, former Governor Jerry Brown signed into law Senate Bill 1383 (SB 1383) establishing a statewide effort to reduce emissions of short-lived climate pollutants (SLCP).

The law specifically sets the following targets:

- Reduce statewide disposal of organic waste by 50% by January 1, 2020 and by 75% by January 1, 2025 (based on 2014 disposal levels)
- Recover and redistribute at least 20% of currently disposed edible food for human consumption by 2025

CalRecycle, the state agency responsible for creating the regulatory standards for SB 1383, has established the following key dates:

- **Effective January 1, 2022:** CalRecycle's regulations to meet statewide organics reduction and food recovery requirements take effect.
- **Effective January 1, 2024:** Regulations may require local jurisdictions to impose penalties for non-compliance on regulated businesses.

WHAT IS ORGANIC WASTE FOR A BUSINESS?

Many businesses produce organic waste without realizing it. Organic waste includes:

■ FOOD

- › Fruit and vegetable scraps
- › Bread, rice, pasta and grains
- › Egg shells
- › Meat, poultry, fish, and shell fish
- › Coffee grounds and tea leaves
- › Bones

■ GREEN WASTE

- › Landscaping waste (grass clippings, leaves, branches, etc)
- › Flowers, plants, and weeds

WHY ORGANIC WASTE?

When organic waste, such as food, green waste, and paper products decompose in a landfill, they produce methane gas – a potent greenhouse gas pollutant. The intent of the organic waste diversion goal is to reduce the emissions of methane gas to combat global climate change.

■ PAPER AND WOOD PRODUCTS

- › Paper bags
- › Coffee filters and tea bags
- › Food-soiled tissue, napkins, and paper towels
- › Non-coated paper plates
- › Paper cups that contain no plastic or coating
- › Wooden chopsticks and coffee stir sticks
- › Pizza boxes

WHAT DO BUSINESSES NEED TO DO?

SB 1383 applies to all businesses in California. If you own a business or apartment/condo complex beginning January 1, 2022 you are required to:

- **Divert organic waste** from the landfill by:
 - Subscribing to and participating in the organics collection service via Republic Services, *or*
 - Arrange for organic waste to be self-hauled and taken to permitted organic waste facilities.

- **Provide collection containers** for organic waste and recyclable materials to employees, contractors, tenants, and customers.
 - Collection service must be arranged so that access to an adequate number, size, and location of containers with correct labels is available
 - Provide indoor containers for organic waste and recyclables in all areas where disposal containers are provided for customers, except in restrooms

- **Containers must meet standardized color requirements:** Gray or black for garbage, blue for recycling, and green for organics. Additionally, containers must have labels with graphic images to indicate acceptable and unacceptable materials. The City of Fairfield and Republic Services may be able to provide these labels at no additional cost.

- **Annually provide employees and apartment/condo residents with educational information** about the legal requirements to compost and recycle including how to properly sort between the three waste streams.

WHAT IF MY BUSINESS DOESN'T PRODUCE ORGANIC WASTE?

Some businesses may be granted a waiver for exemption from some or all requirements of SB 1383 if they can provide documentation and evidence to support a De Minimus Waiver or Physical Space Waiver:

- Total solid waste collection (cumulative total of all waste streams) is more than two cubic yards per week and organic waste is less than 20 gallons per week
- Total solid waste collection (cumulative total of all waste streams) is less than two cubic yards per week and organic waste is less than 10 gallons per week
